

Chinese “Farm to Fork” System in Export Poultry

Mr Zhang Biao Beijing, November 24-26, 2014

Zhuhai Entry-Exit Inspection and Quarantine Bureau of P.R.C

Chinese “Farm to Fork” System in Export Poultry

- Profile
- Why establish the system
- When start to establish the system
- How to establish?
- What's the system?
- Prospect of GIS in export farm

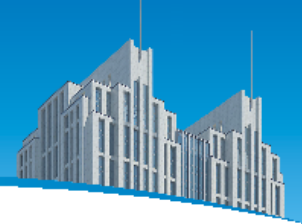

Profile

➤ administration structure

- General administration of Quality Supervision, Inspection and Quarantine of P.R.C(AQSIQ)
- 35 China Inspection and Quarantine(CIQ) directly under AQSIQ at nation port
- 300 CIQ Branch and more than 200 CIQ Services
- employees : more than 30 thousands

Profile

➤ Situation of poultry export

➤ Destilation

- Hongkong and Macao

➤ Trade situation

- 6 million live poultries

➤ Registration farm

- 53

➤ Location

- Guangdong province, Hainan province

Why

- Protect public health
- Protect animal health
- Assurance of product safety
- Responsible for world

When

- BSE in UK
- 97 Hongkong HPAI
- 98 Hongkong Clenbuterol poisoning

How

- Risk analysis
- National regulation
- Guideline

How

➤ Risk analysis

- Zoonoses
- Veterinary drug residues
- Other disease seriously impact to farm

How

➤ Regulation

- General inspection and quarantine procedure for export animals
- Administration regulation of inspection and quarantine in live poultries export to Hongkong and Macao

➤ Guideline

- The guide of farm registration
- The manual of quality management

What's the system

- ◆ Government Supervision
- ◆ Farm registration
- ◆ Production record
- ◆ Official check
- ◆ Official disease surveillance plan
- ◆ Official veterinary drug residue plan
- ◆ Export report
- ◆ Quarantine before export
- ◆ Transport trace
- ◆ Port inspection

What's the system

➤ Farm registration

- Farm environment
- Disease-free
- Farm facilities
- Bio-security requirement
- Technical employee

➤ Production record

- Chicken introduction
- Feeds
- Veterinary drug
- Disinfectant
- Pens change
- Others

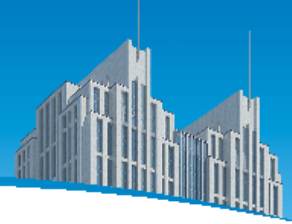

[illegible]

What's the system

➤ Official check

- Clinical inspection
- Bio-security measures
- Facility change
- sampling

What's the system

➤ Official disease surveillance plan

- H5/H7 Avian Influenza
- Infectious Bursal Disease
- New Castle Disease
- Infectious Bronchitis
- others

What's the system

➤ Official residues surveillance plan

- 7 forbidden veterinary drugs (chloramphenicol\some female hormone)
- 37 limited veterinary drugs(tetracycline)

What's the system

➤ Export report

- Which pen
- How many
- When loading

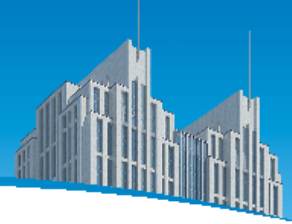

What's the system

➤ Quarantine before export

- Chicken herds isolated in one pen
- Sampling before export
- Clinical inspection

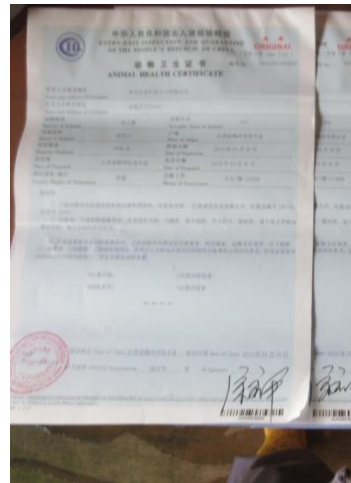

What's the system

➤ Transport trace

- Animal health certificate
- seal

What's the system

➤ Port inspection

- Final check
- Clinical inspection

That's Chinese “farm to Fork” system in export poultries

- ✓ Government Supervision
- ✓ Farm registration
- ✓ Production record
- ✓ Official check
- ✓ Official disease surveillance plan
- ✓ Official veterinary drug residue plan
- ✓ Export report
- ✓ Quarantine before export
- ✓ Transport trace
- ✓ Port inspection

Prospect of GIS in export farm

- ◆ Define disease zone
- ◆ Gather surveillance data
- ◆ Support of qualitative risk analysis

*Thank for your
attention!*
